

Adam Kablanian

Chairman and CEO of Virage Logic

Stanford University
Syria, Aleppo

Profile

Adam Kablanian is an American-Armenian tech entrepreneur and microchip design pioneer,born in 1959 in Aleppo, Syria. He received his primary education at the Lazar Najarian-Calouste Gulbenkian School. He moved to the United States to continue his education at the University of California, Berkeley, graduating in 1983 with a degree in Physics. He began his career as a VLSI microchip design engineer at XICOR Corporation in Milpitas, CA. He also holds a Master of Science in Electrical Engineering from Santa Clara University and an executive MBA from Stanford University. In 1996, Mr. Kablanian founded Virage Logic Corporation based on his expertise in VLSI microchip design. The company grew to employ more than 700 people and became the world's leading embedded memory provider. He served as Chairman and CEO, taking the company public on NASDAQ (VIRL) in 2000. Today, Mr. Kablanian holds 15 U.S. patents.

Beyond his business success, Mr. Kablanian actively supports the Armenian community. He led the fundraising and raised over $4M to establish the Armenian Studies Program at UC Berkeley. He also chaired the San Francisco Bay Area Genocide Centennial Committee, raising funds and organizing community events. Committed to the next generation, he joined the Board of Trustees of the American University of Armenia and later became the chairman of the AUA Development Committee, showcasing his dedication to improving education quality and access.
